

D-Lab SEMINAR

Major Events

D-Lab Project Framing Seminar WINTER 2021

Course Description:

This 2-hour/week seminar leads students through a process of framing projects concerned to build resilience in communities to adverse events that include but are not limited to earthquakes, droughts, wildfires, and the COVID-19 pandemic. Using the D-Lab 4-lens framework (social, environmental, economic, and technical), student teams will work on real-world projects to create design briefs addressing the client's needs. All assignments and presentation preparation will be completed in class.

Graduate students from any department and undergraduates with permission from instructor are welcome to register.

CRN: ABT 298

Days and Time: Tuesdays, 3 – 5 p.m.

Max enrollment: 25 students

Location: Remote Instruction

More Info: <https://piet.ucdavis.edu/dlab0>

Looking for students interested in:

- Learning about planning for adverse risks
- Designing sustainable solutions
- Working with local and international grassroots organizations and nonprofits.

Guest Speakers & Case Studies

Students will work with clients to take action on pressing global issues through dialogue, design, and dissemination.
