# Major Events

## D-Lab Project Framing Seminar WINTER 2021

### Course Description:

This 2-hour/week seminar leads students through a process of framing projects concerned to build resilience in communities to adverse events that include but are not limited to earthquakes, droughts, wildfires, and the COVID-19 pandemic. Using the D-Lab 4-lens framework (social, environmental, economic, and technical), student teams will work on real-world projects to create design briefs addressing the client's needs. All assignments and presentation preparation will be completed in class.

**Graduate students from any department and undergraduates with permission from instructor are welcome to register.**

**CRN:** ABT 298

**Days and Time:** Tuesdays, 3 – 5 p.m.

**Max enrollment:** 25 students

**Location:** Remote Instruction

**More Info:** <https://piet.ucdavis.edu/dlab0>

### Looking for students interested in:

- Learning about planning for adverse risks
- Designing sustainable solutions
- Working with local and international grassroots organizations and nonprofits.

**Learn more about the role of managing waste on solving real world issues.**

### Guest Speakers & Case Studies

Students will work with clients to take action on pressing global issues through dialogue, design, and dissemination.
